Sex Work
Population
Project

What is the Sex Work Population Project?

Started: **2021**

Added new datasets: **2022, 2023**

What is the Sex Work Population Project?

Goals:

- **Collaborate** with other researchers
- Make data **available**
- **Involve industry participants** in research

**Sex Work
Population
Project**

Anonymized Data is Available!

2023 populations

- **Monthly** estimates: **16,470** to **19,496**
- **Annual** estimate: **87,736** (95% CI 87,288 – 88,184)

TODAY'S PAPER: Playing the Name Game

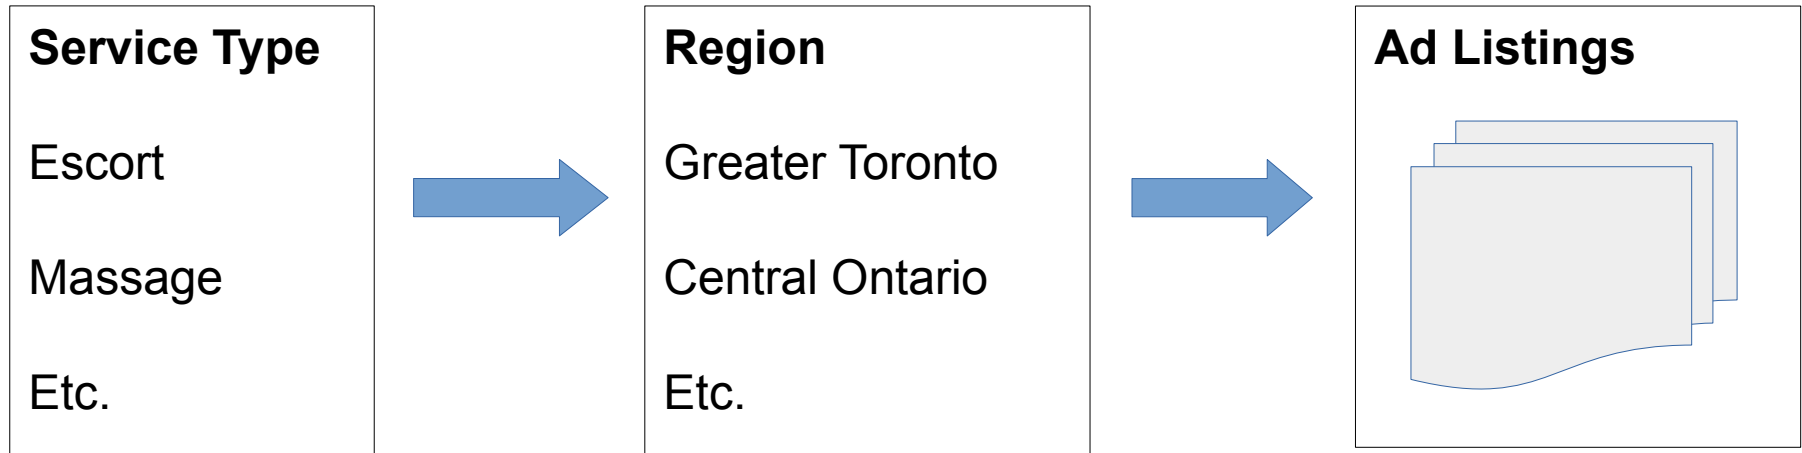

Authors: Sean Strygg, Susan Davis, and Annie Temple

<https://populationproject.ca/NameGame>

Playing the Name Game: Anatomy of the Source Site

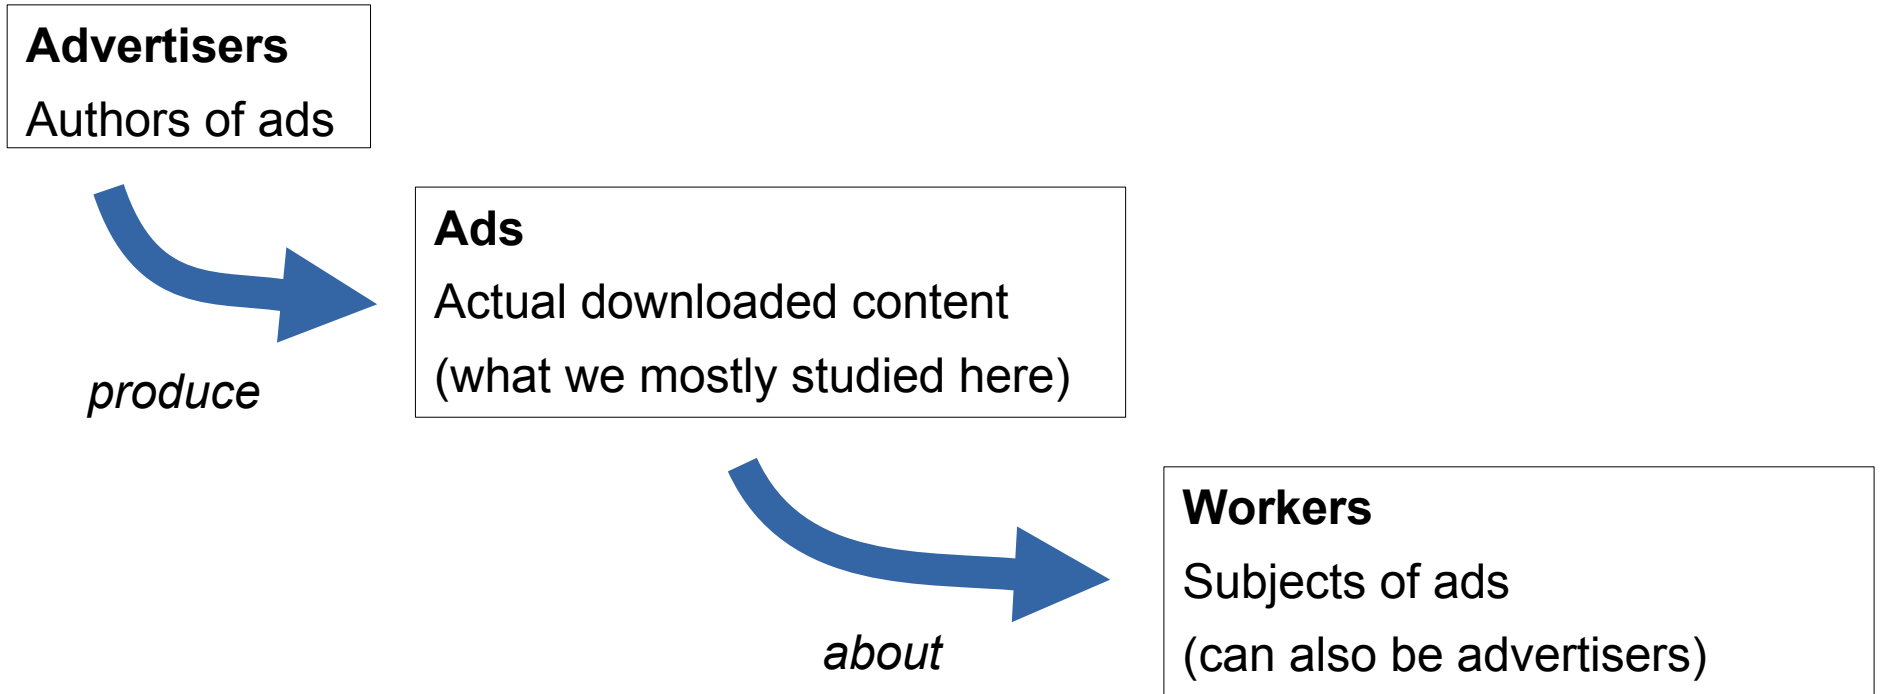

The source site has been in existence for **over a decade** and is one of the **main venues** where sex workers **advertise in Canada**

Source site layout:

Playing the Name Game: Anatomy of the Source Site

When analyzing classified sites we distinguish between **3 entities**:

Playing the Name Game: Daily Views

Median daily views: 128 (IQR 64-128)

Mean daily views: 195 (SD 234)

Some ads could have **thousands of daily views**

Playing the Name Game: Demographic Variables

All demographic variables studied were significant but only *Service Type* showed a **large effect size**.

- **Cis/Trans Female Escorts** tended to get **many more views** than other service types

There were **significant interaction effects** between *Service Type*, *Ethnicity*, and *Age Group*

Playing the Name Game: Ethnicity

Ethnicity vs Daily Views

Playing the Name Game

Why do ads for some ethnic groups tend to get fewer views?

Black ads tended to have **higher hourly rates**, more **Male Escorts** ads

Asian advertisers tended to **have more ads**, more **Female Massage** ads

Playing the Name Game: Other Variables

We did not find strong support for the findings of earlier work.

- **BMI vs Rates (strongest relationship: pearson correlation 0.2)**
- **Most correlations were between 0.05 and 0.09**

Playing the Name Game: Other Variables

Advertisers with **more ads** were **negatively correlated** with average **daily views**: -0.2

Daily views were **not strongly correlated** with:

- **Hourly rates**: 0.02
- **Face images**: 0.02
- **More images**: -0.02

Playing the Name Game: Male Advertisers

Out of **1210 male escorts**, **593** catered to **women** and **261** catered to **couples**

Up to **5181 prospective clients** may have viewed ads from **these workers** in any given day

Playing the Name Game: Content Analysis

Comparing ads having **more views** with ads having **less views**

Samples:

- **584 or more daily views** (top 7%) versus
- **32 or fewer daily views** (bottom 7%)

Used **log likelihood** to identify unique terms (Dunning 1993, Rayson 2003, 2008)

**Sex Work
Population
Project**

Playing the Name Game: Content Analysis

a) High daily views

b) Low daily views

“**Black**” generally used when the advertiser won’t accept Black men

“**Party**” getting high as a service (GHAAS)

Low view ads tended to be for **online** or **massage** services

Playing the Name Game: Who Pays the Most for Advertising?

Spending was estimated with these formulas:

Ad_n cost = base bump cost X days ad_n visible in 2023

*Advertiser spending = **sum**(Ad₁ cost, Ad₂ cost, ...)*

**Sex Work
Population
Project**

Playing the Name Game: Who Pays the Most for Advertising?

Average per capita spending by **Service Type** (most vs least):

Female Massage \$1280, Female Escorts \$542, Male Escorts \$486

Sex Work
Population
Project

Playing the Name Game: Who Pays the Most for Advertising?

Average per capita spending by **Ethnicity** (most vs least):
Asian \$820, Indo Canadian \$197, Canadian Born Chinese \$170

Sex Work
Population
Project

Playing the Name Game: Who Pays the Most for Advertising?

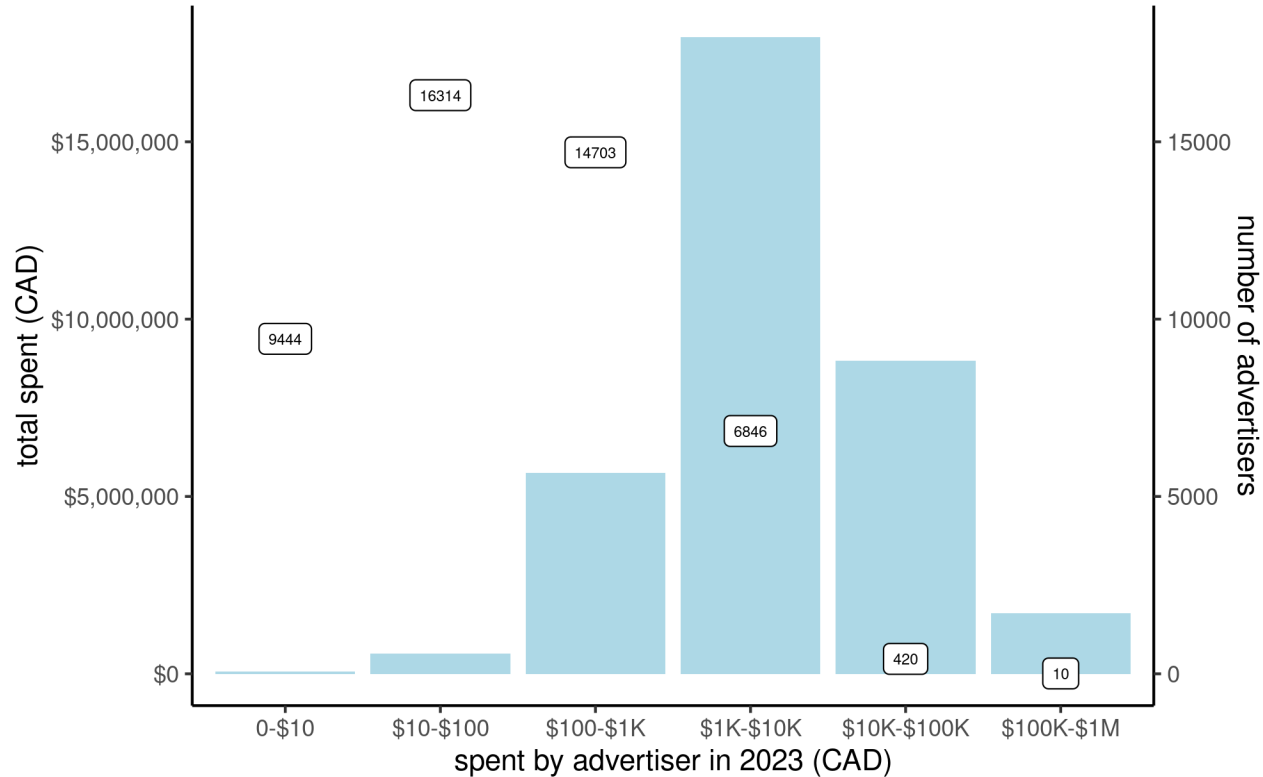

Average per capita spending by **Age Group** (most vs least):
41-50 \$819, 21-30 \$630, 18-20 \$613

**Sex Work
Population
Project**

Playing the Name Game: Who Pays the Most for Advertising?

Ten advertisers spent over \$100k with the top spending over \$350k

Playing the Name Game: Conclusions

What are my take-aways from the study?

Thank You!
